

Dr. Antoine GLORIA

French

IAM, University of Bonn, Germany

From 1/04/2006 to 1/07/2006

3 months

ESR

Universita di Roma 'Tor Vergata'

Italy

I have graduated at the Ecole Polytechnique (France).

I began my PhD in September 2004 under the supervision of Pr. Claude Le Bris at the Ecole Nationale des Ponts et Chaussees, France.

I have spent three months in Rome within the project Multimat. There I have worked with Andrea Braides and some of his former students.

I defended my PhD in June 2007.

Since October 2007, I am a post-doc in Bonn, in the group of Felix Otto, another Multimat team.

From my time in Rome, I have published two articles and one proceeding with researchers from the Italian team, and we still work together.

During my PhD I have had the opportunity to travel a lot, partly thanks to the European project, both with the French and the Italian teams.

I had no responsibility in the Network.

I have also appreciated the high level of the organized conferences, especially concerning the calculus of variations applied to mechanical problems, as well as the different tutorials and summer schools organized or advertised through the network.
